You can rely 100% on:

**Minimal emissions,
maximum efficiency.**

100% cost control

With the Event Ticket, visitors to your event can travel in comfort to their destination for an all-inclusive, attractive fixed price – with 100% green energy, anywhere in Germany.

100% service – with various solutions and a single point of contact

The Event Ticket is available with 1,000 or more participants or with the purchase of 100 tickets. In addition to tailored travel, you as event manager can benefit from measurable success factors thanks to efficient services:

- Expert advice
- Attractive package offers
- Smooth organisation from a single provider
- Peace of mind for planning and pricing
- Transparent billing

100% mobile from start to finish

From company events and incentive events to trade fairs and conferences – whatever your event, your visitors can travel to the destination in comfort at a special fixed price:

- From any train station in Germany
- By local transfer on modern, comfortable coaches
- In luxury, in a limousine with personal chauffeur
- By Call a Bike or Flinkster – Deutsche Bahn's rental options

100% green energy – moving forward together

With the Event Ticket from Deutsche Bahn, all visitors can travel on the DB long-distance train network with 100% green energy as standard. We calculate the amount of energy that event visitors would probably use for their long-distance travel and then invest this amount of renewable energy into the traction current grid.

Important: With the Event Ticket, you can reduce the carbon footprint of your event and make a lasting difference. After all, up to around 70% of the overall emissions of an event are due to the arrival and departure of visitors alone.
